

Baruntse Expedition

Trip Overview

Barun Tse Expedition is situated at Khumbu Region on the lap of Mt. Everest and Mt. Makalu. Among the world's highest peaks, Mount BarunTse Expedition is an extremely pleasing climb at a height of 7152m (23,465ft) and encircled by Mt. Everest, Lhotse, Makalu, Chamlang and Amadablam all of which are renowned worldwide. In 1954 BarunTse was first climbed by Colin Todd and Geoff Harrow led by Sir Edmund Hillary via the South-East ridge which is now the chief summit route to climb BarunTse. BarunTse was also one of the early Himalayan peaks recognized by Edmund Hillary and his team for climbing east of Everest. BarunTse has been welcoming countless climbers since then. BarunTse Expedition is one of the best adventure trips in Nepal and the best season to climb BarunTse are spring and autumn but most climbers seem to have succeeded the mountain mostly in the spring season due to safety reasons. The route here is basically an undemanding climb on snow and ice. There are three glaciers that surround Mt. BarunTse, On the south it is enclosed by the Hunku Glacier, by the Barun Glacier on the east, and by the Imja Glacier on the northwest. The BarunTse Expedition will approach this beautiful peak through the Hinku/Hongu valley.

The Base Camp is situated at 5,400m in a beautiful pasture close to a small lake. And before the base camp, there are two mountain passes to cross: Tsetrawa La at 4,610m and Mera La at 5,415m. Mera peak 6470m is one highly recommended peak to climb for acclimatisation on the way to BarunTse Expedition. So most of the climbers make it to the summit of Mera peak and then decline to the base of Mera Peak to continue to Mt. BarunTse. The climbing route to Barun Tse is alongside the south ridge of the mountain (as mentioned) on which a high base camp is located at 5,800m and subsequently, an advance base camp is set up near Barun Tse's West Col at 6,135m. This is a very steep section of the peak so we will fix ropes to support our climb and avoid falling into cracks. To arrive at the peak from this camp, we will follow the south ridge with two higher camps, at 6,420m (at the base of the south-east ridge, and at 6,650m). Between base camp and Camp II, the climbers will have to get to work on to 40-50 degree ice slopes and climb a knife-edged ridge higher presents enlivening climb to the top having striking view that includes south faces of Lhotse, Makalu, Chamlang, Kanchenjunga, and Peak 41 and down to the Hinku valley. The demand to climb to Mount Baruntse has been growing and it has become one of the most climbed and preferred mountains.

Barun Tse Expedition 7152m is the one of the best destinations in Mahalangur Himal range, which looks over the 7000m to 8000m peak of Nepal's Himalaya. BarunTse is located in between Solukhumbu and Sangkhuwasabha district in Nepal. Climbing Himalaya for Mountaineering info, and Explore in Nepal Himalaya peak, we would like to organise BarunTse Expedition 7152m as in: as per our client's requirement or in a fixed package arranged by us to provide different experience as compared to others.
