

Lhotse Expedition

Trip Overview

Lhotse Expedition is one of the world's highest peak expeditions in the Nepal Himalayas. Mt. Lhotse is located at the border of Tibet and Nepal at an elevation of 8,516m (27,940 ft). Lhotse means 'South Peak' because the mountain lies south of Everest and the name has been given by the Sherpas. Due to its location, Lhotse is by mistake sometimes identified as the south peak of the Everest massif - the mountain lies south to the Everest. The South Face of Lhotse is one of the largest mountain faces in the world and Mount Lhotse itself is ranked the fourth highest mountain in the world. But Lhotse is famous for its amazing and striking south face. The south face of Lhotse rises 3.2km within 2.25km horizontal distance making it the steepest face of this size in the world. It is a very difficult climb and has rarely been attempted and attempts have turned into fatalities. The western side of Lhotse is known as the Lhotse Face is the normal ascent route and it is a technically demanding route and involves solid climbing skills and experience. Mount Lhotse is often seen as a minor eight-thousander because Lhotse has one of the smallest topographic prominence values of any eight-thousander, as it rises only 610 m above the South Col. Lhotse is a stiff climb and has three summits: Lhotse Main 8516m, Lhotse Shar 8382m and Lhotse Middle or East 8410m. Lhotse Main was first climbed in 1956 by Ernst Reiss and Fritz Luchsinger who were part of a Swiss expedition. On December 5, 1979, Lhotse Shar was first climbed by Sepp Mayerl and Rolf Walter by taking the South-east-ridge. It was not until May 23, 2001 that Lhotse Middle was conquered by the Russian Expedition: Eugeny Vinogradsky, Serguei Timofeev, Alexei Bolotov and Petr Kuznetsov. There may be many difficulties including high altitudes, harsh weather conditions and even sheer exhaustion and the summit is very sharp with no place to sit down. The most risky part of climbing Mt. Lhotse is its Khumbu Icefall. However if you are a determined climber, there is no one stopping you and Mount Lhotse is one of the most beautiful mountains definitely worth climbing.

Lhotse Expedition 8516m is one of the best destinations in the Mahalangur Himal range, which looks above the 8000m peak of Nepal Himalaya. Lhotse Expedition is located at Solukhumbu district in Nepal. Connect with Climbing Himalaya for Mountaineering info, and to Explore this Nepalese Himalayan peak, we would like to organise Lhotse Expedition 8516m as in: as per our client's requirement or in a fixed package arranged by us to provide different experience as compared to others. We offer a Package of Lhotse Expedition that covers: Logistic, Transportation, Accommodation, and Professional Mountain Guide - all of precisely what we'll need for climbing Lhotse Peak and at a reasonable price. Lhotse Expedition costs offered here are reasonable in a sense that we make sure that you have the best of everything. We would like you to explore the Himalayas and experience professional peak climbing in Nepal. All climbers who want to be at the summit of Lhotse in Nepal, Please feel free to connect with us at Climbing Himalaya (sister company of Trip Himalaya) to achieve your most awaited dream. We believe we are proficient enough to handle any kind of problems perfectly and professionally during your expedition in Nepal.
