

Annapurna I Expedition

Trip Overview

Annapurna I Expedition is the one of the technical Expeditions in Nepal above 8000m mountain. The Mt. Annapurna I is located in Central Himalaya Nepal at an altitude of 8091m above the sea level. Mount Annapurna is ranked the 10th-highest summit in the world yet, Annapurna, one of Nepal's renowned mountain ranges, embraces an array of peaks, all of astonishing heights. In 1950, a French expedition team led by Maurice Herzog first climbed Annapurna 8091m and since then has been ascended only by very few then. Generally, although the name Annapurna is translated as Goddess of the Harvests, Annapurna is the name of the goddess which in Sanskrit denotes "full of food". Therefore, climbing Annapurna is both adventurous and spiritual while it also brings us close to nature. The glaciers of Annapurna nourish the rivers in the region turning the landscapes at the lower elevation into fertile land filled with flourishing green forests rich in wildlife and vegetation, hence called Goddess of the Harvests.

The Mount Annapurna Expedition normally consists of two faces to climb. West south face is the most famous one which follows the trekking route from Pokhara, Tatopani, Ghasa, Late, Misri Khola to the Annapurna Base Camp. The other route is using Annapurna Sanctuary which is very less popular. There are four summits in the range of Annapurna. The entire massif forms a barrier on the northern side of the Pokhara valley. The main summit stands to the west of Annapurna sanctuary. The Annapurna massif is protected in the Annapurna Conservation Area, the first and largest such area in Nepal built in 1986 by the King Mahendra Trust for Nature Conservation. The Annapurna Conservation Area is home to several world-class treks, including the Annapurna Circuit and the entire massif and surrounding area are protected within ACAP. This protected area covers 7629 sq.km over Manang, Mustang, Kaski, Myagdi and Lamjung districts, so the beautiful landscape surrounding the Annapurna massif could be well-protected. Mount Annapurna shimmers beautifully and offers an impressive view through the Himalayas.

Mount Annapurna is one of the most excellent travel destinations in the world since Annapurna offers some of the most popular trekking and expeditions in the world. The region in Annapurna is one of the most popular areas to trek on. In Nepal, about two-third of the trekkers go around Annapurna Circuit making it really popular trekking. Mount Annapurna is equally fascinating and frightening, the combination of which makes the expedition even more challenging. The best time to Visit Mount Annapurna would be in spring and autumn. We have to accept the fact that there is no shortcut to the peak! It always involves some physical fitness, dedication and a great deal of effort for the best result.

Annapurna I Expedition 8091m is the one of the best destination in Annapurna Himal range who is looking Above 8000m peak in Nepal Himalaya.
